Dear Corporate Partner,

It is our pleasure to invite you to the **Heart of a Woman** on February 11, 2023, at the Houston Methodist Research Institute and Houston Methodist Institute for Technology, Innovation & Training (MITIE).

Program Overview

In women, the greatest cause of death is heart attack. Yet, many women are unaware of the risk factors and the warning signs of heart attack, which differ from those of men. Increased awareness is key to preventing heart problems, so Houston Methodist DeBakey Heart & Vascular Center and the National Federation of Business and Professional Women Clubs – Houston, affiliate of BPW International, are partnering to host “Heart of a Woman.” This exciting conference is designed to educate women about the gender-specific symptoms, diagnosis and treatment of heart disease and how women can proactively improve their own heart health. In addition, guest speakers representing science, medicine, and government will discuss their roles in addressing gender discrepancies in cardiovascular care for women.

Needs Assessment

This course provides nurses, patients, and the public information about prevention, symptoms, diagnosis, and treatment of different heart conditions. During this course, participants will interact with speakers to learn about the topics such as spider veins, atrial fibrillation, healthy heart diets, and more.

Educational Objectives

Upon completion of the conference, participants will be able to:

- Understand how the heart of women differs from men, including the symptoms and treatments of heart disease, atrial fibrillation, heart failure, and more.

Educational Methods

Didactic Lecture

Evaluation Methods

Evaluation by questionnaire will address program content, presentation, and possible bias.
